BINV1060 Systèmes d'exploitation

Ch. 1.2 Architecture Matérielle

Unix

A noter

- ■Les applications se reposent sur l'OS
- ■Elles n'accèdent pas directement au hardware
- ■Il y a mode « utilisateur » et un « mode noyau »
- ■On utilise l'OS via des « appels systèmes »

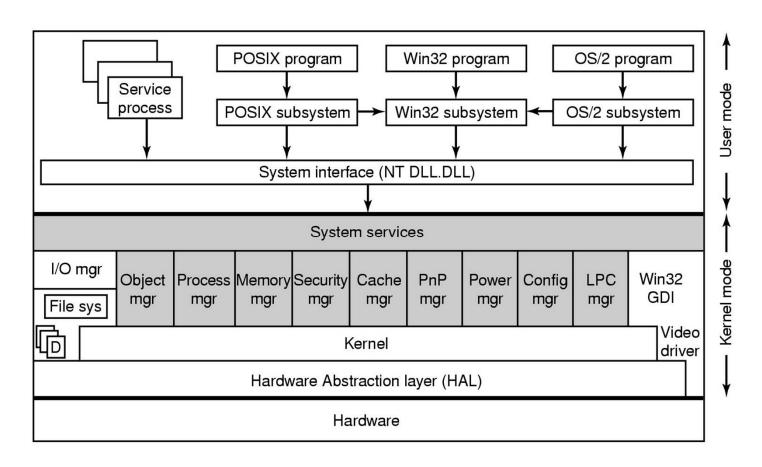

Dans le noyau: yurk!

System calls					Interrupts and traps		
Terminal handing		Sockets	File naming	Map- ping		Signal	Process creation and
Raw tty	Cooked tty	Network protocols	File systems		rtual mory	handling	termination
	Line disciplines	Routing	Buffer cache	Page cache		Process scheduling	
Character devices		Network device drivers	Disk device drivers		s	Process dispatching	
Hardware							

Windows NT (XP, 7)

Operating Systems I

On étudiera (plan du cours)

- ■Les appels systèmes
- Les processus
- ■La gestion des entrées sorties
- ■La gestion de la mémoire
